## About Exit International

**Exit International** was founded in Australia in 1997 by Philip Nitschke (PhD, MD) and has since become a global leader in the provision of end-of-life information and choices.

In 1996, Dr Nitschke became the first physician to administer a legal, lethal, voluntary injection under the world's first right-to-die law, Australia's *Rights of the Terminally Ill Act*. The law lasted nine months before being overturned.

Today, Exit's focus is upon assisting the elderly & people who are seriously ill. Exit believes accurate & concise information enables adults to make their own lawful end-of-life decisions, should the need ever arise.

Exit International (non-profit) operates in Australia/NZ, Nth America & the UK, and is supported by a network of over 30 local Chapters.

## Member Services

**Exit Workshops** are held throughout the year in the US, Canada, UK, Australia & New Zealand. Workshops focus upon practical end-of-life information including useful drugs, the Swiss option, use of Inert Gases & include extensive Q&As. Exit workshops are delivered both face-2-face and via the Web.

**Exit Local Chapters** (branches) operate internationally. These informal, friendly groups meet regularly for a range of activities (including social networking).

**Nancy's Friends** is a network of trained volunteers who provide support, friendship & information about end-of-life issues.

**Exit Research & Development** involves an on-going program of scientific endeavour into technology-based, end-of-life solutions. Research results/ break-throughs are published as regular updates in the online *Peaceful Pill eHandbook*.

## Exit Expertise

**The Peaceful Pill eHandbook is available at [www.peacefulpill.com](http://www.peacefulpill.com)**

**“As a rational adult, I have a right to the best end-of-life information ... only then can I make fully informed decisions about my future.”**

**Dr Philip Nitschke**
