

SARCO PROJECT

Sarco

About Sarco

The Sarco is a 3D-printed capsule that allows a person of sound mind to control the manner and the timing of their death without medical involvement.

Sarco is a drug-free, lawful, reliable and peaceful means of death.

The plans for the Sarco will be made available in *The Peaceful Pill Handbook*.

Sarco works by lowering the level of oxygen in the capsule. The person will lose consciousness quickly and die within a few minutes.

The Research and Development cost of the Sarco Project is > €600,000. The final cost of one Sarco will be ~ €5000.

Sarco is expected to be used in late 2023. Sarco will be first used in Switzerland (or Germany) where help to suicide is lawful.

Advantages

- > Peaceful
- > Reliable
- > Lawful
- > No doctors needed
- > Fully self-controlled
- > Nitrogen is lawful
- > Nitrogen can never be banned
